**DETAILED ACTION**

***Election/Restrictions***

Claims 1-15,26-30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/29/05.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 16-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Schaller. Figure 3 of the patent shows the claimed apparatus.

Claims 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Brewer. Figure 4 of the patent shows the claimed apparatus.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 22-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schaller in view of Brewer. It is not clear from Schaller how the cutting plates are held in the desired position. Brewer shows similar apparatus including the use of keys 12 to

hold the plates in the desired position. In order to hold the plates in the desired position, it would have been obvious for one of ordinary skill in the art to modify Schaller by using keys as the locating means, taught to be desirable by Brewer.

Claims 21-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brewer in view of Schaller. Brewer does not appear to offset his knives. This could result in damaged apparatus. Schaller solves this problem by showing similar apparatus including the use of offset knives. In order to prevent the apparatus from being damaged, it would have been obvious for one of ordinary skill in the art to modify Brewer by offsetting the knives, taught to be desirable by Schaller.
